TODAY'S SESSION

Three Modules

Quizzes follow each section.
Certificate issued upon full completion.

01

Dashboard Training

Dashboard Overview — 11 critical areas of the PropertyMax.ai platform

25 min

02

Phone Excellence

Four Pillars of Excellence · Five Golden Questions · Common Mistakes

25 min

03

Marketing Training

9 Sections: Call Recordings, Collections, To-Do's, Appointments, Text Messages, Section 8, CRM Directory, Maintenance Requests, Tickets

90 min

- Quizzes follow each section · Certificate requires all 12 quizzes + 2 acknowledgments · Training Hub always available at propertymax-ai-training-hub.manus.space

The PropertyMax.ai Training Hub is always available at **propertymax-ai-training-hub.manus.space**. Every section includes an AI-narrated PIP training video, a step-by-step workflow guide, and a knowledge-check quiz. Progress is tracked automatically — your completion certificate is issued once all quizzes and acknowledgments are done.

STEP 01

Watch the Video

Each section opens with an AI-narrated PIP training video. Watch it fully before moving on — the quiz questions are based on what you see and hear.

STEP 02

Follow the Workflow

Below each video is a step-by-step workflow guide. Use it as a reference when applying the process in PropertyMax.ai. It's always available — bookmark it.

STEP 03

Take the Quiz

Each section ends with a knowledge-check quiz. Your score is recorded automatically. You can re-take any quiz at any time to improve your score.

Re-watch any section at any time — the hub is your permanent reference library

Progress is tracked automatically — no manual reporting needed

Certificate requires ALL 12 quizzes + 2 module acknowledgments complete

01

MODULE

PROPERTYMAX.AI TRAINING HUB

Dashboard Training

Your Command Center for Property Management

- 11 critical dashboard areas every manager must know
- Calendar color-coding for Appointments, Maintenance, and Inspections
- CRM Directory — 5 contact tabs: PRO, TEN, VEN, DIR, EMP
- 1 quiz · 1 acknowledgment required for certificate

11 Areas You Must Know

The Dashboard Overview video walks through every key section of PropertyMax.ai. These are not optional features — they are the daily tools of every property manager.

DASHBOARD OVERVIEW — CRITICAL AREAS

01 **Navigation Bar**
Primary menu and module access

03 **Call Recordings**
5 tabs — daily review required

05 **Text Messages**
All tenant and prospect texts

07 **Maintenance Requests**
Unassigned, Overdue, Assigned

09 **Calendar**
Color-coded by event type

11 **To-Do's**
Rent, Sales, Maintenance tasks

02 **Collections Overview**
Gates, Billed, Collected, Difference

04 **Section 8 Inspections**
Pending, Scheduled, Completed

06 **Tickets**
Internal communications channel

08 **Appointments**
Showings, key pickups, tours

10 **CRM Directory**
PRO, TEN, VEN, DIR, EMP tabs

All 11 areas covered in the Dashboard Overview video

MODULE 01

QUIZ PREP

Dashboard Quiz: 7 Key Facts

Review these before taking the Dashboard Overview quiz in the Training Hub.

KNOW THESE BEFORE YOU TAKE THE QUIZ

TOPIC	ANSWER
Call Recordings Tabs	MarketingUrgentRentMaintenanceVoicemail
Golden Score	Performance metric – call quality + data accuracy combined
CRM Directory Tabs	PROTENVENDIREMP
Calendar — Blue	● Appointments (showings, key pickups, tours)
Calendar — Orange	● Maintenance events and work orders
Calendar — Teal	● Section 8 HUD Inspections
Calendar — Yellow	● Today's date highlight

02

Phone Excellence

The standard for every single call — no exceptions, no shortcuts.

THE STANDARD

Phone Excellence is not a suggestion.
It is the **minimum standard** for every call, every time, with every caller.

Professionalism

Warmth

Consistency

Accuracy

Every call must reflect all four pillars — no exceptions. These standards apply equally to a frustrated tenant and an excited prospect. There is no call too short or too routine to skip them.

PILLAR 01

Professionalism

Clear, composed, timely communication. Every commitment made on a call must be followed through. You represent ApartmentCorp on every call — no exceptions.

*Answer within 3 rings.
Introduce yourself by name.*

PILLAR 02

Warmth

Callers must feel genuinely welcomed and valued. Active listening and empathetic responses are non-negotiable. Warmth is demonstrated through action, not just tone.

*Use the caller's name.
Acknowledge before answering.*

PILLAR 03

Consistency

Every caller receives the same high-quality experience regardless of time, call type, or which staff member answers. Consistency builds trust at scale.

*Same standard every call.
No exceptions for "easy" calls.*

PILLAR 04

Accuracy

Information captured correctly and completely on the first attempt. Accurate data powers PropertyMax.ai's AI systems. Wrong data breaks the entire workflow.

*Verify every data point.
Accuracy is a system requirement.*

01

Professionalism in Practice

Professionalism is not about formality — it is about reliability. When you answer a call, you represent ApartmentCorp. Every word and every commitment is a reflection of the company.

MODULE 02 • PHONE EXCELLENCE

Professionalism means every call reflects the company standard — regardless of how busy you are, how difficult the caller is, or how routine the call seems.

✓ DO	✗ DON'T
✓ Answer within 3 rings Prompt answers signal that callers are a priority	✗ Let calls go to voicemail during business hours Missed calls = missed prospects and frustrated tenants
✓ Introduce yourself by name and property "Thank you for calling [Property], this is [Name]"	✗ Answer with just "hello" or "yeah?" Callers don't know who they reached or if they called the right place
✓ Follow through on every commitment made on the call If you say you'll call back by 3pm, call back by 3pm	✗ Promise a callback and forget Broken commitments destroy trust and generate complaint calls
✓ Stay composed and solution-focused under pressure Calm, clear responses de-escalate difficult callers	✗ Match the caller's frustration or become defensive Emotional reactions escalate situations and reflect poorly on the property

Warmth is often misunderstood as simply being “nice.” In practice, warmth means making the caller feel **heard**. This requires active listening — repeating back key information, acknowledging concerns before jumping to solutions, and using the caller’s name throughout the conversation.

TECHNIQUE 01

Acknowledge First

Before offering any solution or information, acknowledge what the caller has said. This signals that you are listening — not just waiting for your turn to speak. Acknowledgment de-escalates tension and builds rapport instantly.

SAY THIS

“I understand — let me make sure I have this right before we move forward...”

TECHNIQUE 02

Use Their Name

Personalization signals that this is not a scripted, transactional interaction. Using the caller’s name — once you have confirmed it — makes the conversation feel individual and respectful. It is one of the simplest and most powerful warmth signals available.

SAY THIS

“Absolutely, Maria — let me pull that up for you right now.”

TECHNIQUE 03

Confirm Understanding

Before answering or transferring, confirm that you have understood the caller’s need correctly. This prevents miscommunication, demonstrates attentiveness, and gives the caller confidence that their issue will be handled accurately.

SAY THIS

“So what you’re looking for is a 2-bedroom available in March — is that right?”

Key Insight: Warmth is not about being cheerful — it is about making the caller feel that their call matters. A caller who feels heard is far more likely to trust you, follow through, and become a resident.

PropertyMax.ai's AI features — automatic prospect records, AI-generated To-Do's, call summaries, and follow-up suggestions — are only as good as the data that feeds them. **Accuracy is not just good practice — it is a system requirement.**

THE ACCURATE DATA IMPACT CHAIN

WHAT BREAKS WHEN DATA IS WRONG

- ✗ Misspelled name → AI cannot match prospect to future calls
- ✗ Wrong phone number → follow-up texts never reach the prospect
- ✗ Missing reason for call → AI To-Do's are generic or absent
- ✗ No email captured → tour confirmations and brochures never sent

THE ACCURACY RULE

**Accuracy is not just
good practice —
it is a **system requirement**.**

Every field you fill in correctly is a step in the AI chain. Every field you skip or get wrong breaks the chain — and costs a lease.

These five questions are the minimum information required from every prospect on every call. Missing even one creates a gap in the prospect record that the AI cannot fill. These are not a script — they are a **checklist**.

#	QUESTION TO ASK	WHY IT MATTERS
01	What is your full name?	Personalized communication + accurate prospect record creation in PropertyMax.ai
02	What is the best phone number to reach you?	Primary follow-up contact method — required for AI-generated To-Do's and callbacks
03	What is your email address?	Tour confirmations, property brochures, lease application links, and follow-up communications
04	What is your reason for calling today?	Understand needs, tailor the conversation, and populate the AI-generated call summary correctly
05	How did you hear about us?	Marketing channel effectiveness data — directly informs where advertising dollars are spent

 **Critical Rule:** All 5 questions must be asked on every prospect call — even if the call is short, even if the prospect seems impatient, even if you already know their name.

Common Mistakes to Avoid

Understanding what **not** to do is just as important as knowing the standard. These are the most frequent failures observed in call recordings — each one is avoidable with consistent practice.

MISTAKE	IMPACT	CORRECTION
✖ Skipping the Golden Questions	Incomplete prospect record — the AI cannot generate To-Do’s or follow-up suggestions without the 5 required data points	✔ Ask all 5 Golden Questions on every prospect call — no exceptions, no shortcuts
✖ Not using the caller’s name	Caller feels like a transaction, not a person — reduces warmth score and damages the relationship before it starts	✔ Confirm the caller’s name early in the call and use it at least twice throughout the conversation
✖ Making promises you can’t keep	Damages trust permanently — a broken commitment is worse than never making one. Creates follow-up failures that affect the whole team.	✔ Only commit to what you can deliver. If unsure, say “Let me confirm and get back to you by [time].”
✖ Rushing to end the call	Caller feels dismissed — often leads to a callback, missed data, or a negative review. Urgency signals disrespect.	✔ Confirm all questions are answered before closing. End with: “Is there anything else I can help you with today?”

• Every mistake on this list has been observed in actual call recordings. Recognition is the first step to correction.

MODULE 03 OF 03

Marketing Training

9 Sections — 9 Daily Workflows

Marketing Training covers every workflow in the Marketing tab and dashboard. Each section maps directly to a daily operational responsibility — from reviewing call recordings to managing maintenance requests and tracking tickets.

CALL RECORDINGS

COLLECTIONS

TO-DO'S

APPOINTMENTS

TEXT MESSAGES

SECTION 8 INSPECTIONS

CRM DIRECTORY

MAINTENANCE REQUESTS

TICKETS

03

Marketing Training covers every workflow in the Marketing tab and Dashboard. Each section has a training video, a quiz, and a daily workflow you will use every single shift.

SECTION 01

Recent Call Recordings

Review, action, and close out every call recording daily across 5 tabs

SECTION 02

Collections

Monitor Gates, Billed, Collected, and Difference — act on any gap immediately

SECTION 03

To-Do's

Four tabs: My To-Do's, Rent, Sales, Maintenance — your daily task engine

SECTION 04

Appointments

Schedule, confirm, and complete every appointment — use the Complete Checklist button

SECTION 05

Text Messages

All tenant and prospect communications must go through PropertyMax.ai — not personal phones

SECTION 06

Section 8 Inspections

HUD compliance tracking — Pending, Scheduled, Completed. Every unscheduled day is a risk.

SECTION 07

CRM Directory

Five tabs: PRO, TEN, VEN, DIR, EMP — post-call workflow lives here

SECTION 08

Maintenance Requests

Priority order: Unassigned → Overdue → Assigned → Completed. Red X to close.

SECTION 09

Tickets

Internal communication channel — Received, Sent, Completed. Follow up, don't forget.

Call Recordings are your daily audit of every inbound call. This six-step workflow ensures every recording is reviewed, every action item is addressed, and every completed item is closed out correctly.

01

**Open the Dashboard**

Log in to PropertyMax.ai and navigate to the main Dashboard

02

**Scroll to Call Recordings**

Locate the Recent Call Recordings section — check all 5 tabs: Marketing, Urgent, Rent, Maintenance, Voicemail

03

**Play the Recording**

Listen to the full call — do not skip or skim

04

**Check All Action Items**

Review every AI-generated action item listed below the recording — confirm each is addressed

05

**Click the Red X**

Only after all action items are confirmed — click the Red X to close the recording

06

**Refresh & Repeat**

Move to the next recording — repeat for all tabs, every day

DASHBOARD • RECENT CALL RECORDINGS

PropertyMax.ai • Dashboard • Recent Call Recordings panel

Call Recordings: The 5 Tabs

The Call Recordings section is divided into five tabs — each representing a different category of call. **All five must be reviewed every single day.** Skipping even one tab means missing action items that directly affect revenue, compliance, and resident satisfaction.

 CHECK ALL 5 • EVERY DAY

TAB 01

Marketing

- Prospect inquiries and leasing calls
- Verify **5 Golden Questions** were captured
- Check AI-generated follow-up To-Do's

HIGHEST PRIORITY

TAB 02

Urgent

- Emergency and escalated calls
- Requires **same-day** response
- Never leave an Urgent item overnight

SAME-DAY ACTION REQUIRED

TAB 03

Rent

- Payment inquiries and late rent calls
- Cross-reference with **Collections** section
- Log payment arrangements made on call

REVENUE IMPACT

TAB 04

Maintenance

- Repair requests and work order calls
- Verify request was **logged in system**
- Cross-reference with Maintenance Requests section

RESIDENT RETENTION IMPACT

TAB 05

Voicemail

- All missed calls requiring callback
- Return **every voicemail** within 2 hours
- Log callback outcome in prospect record

2-HOUR CALLBACK STANDARD

Section 2: Collections Overview

The Collections section gives you a real-time financial snapshot of your property. It shows **four key numbers** — and the relationship between them tells you exactly where your attention is needed today.

NUMBER 01 Gates	NUMBER 02 Billed	NUMBER 03 Collected	NUMBER 04 Difference
WHAT IT MEANS Expected total rent for the property Gates represents the total amount of rent that <i>should</i> come in based on all active leases. This is your baseline — the number everything else is measured against. WATCH FOR Sudden drops may indicate a lease expiration or vacancy that wasn’t updated	WHAT IT MEANS Amount actually charged to tenants Billed is what has been posted to tenant accounts. It should match Gates closely. A significant gap between Gates and Billed means charges were not posted correctly. WATCH FOR Billed significantly lower than Gates = missed charges or posting errors	WHAT IT MEANS Amount actually received from tenants Collected is the money that has been paid and processed. This is your actual revenue for the period. Compare it against Billed to understand how much is still outstanding. WATCH FOR Low Collected relative to Billed = active delinquency requiring follow-up calls	WHAT IT MEANS The gap between Billed and Collected Difference is the most critical number. It shows exactly how much rent has been charged but not yet paid. A large Difference is not just a number — it is a list of tenants who need to be contacted today. ACTION REQUIRED Any significant Difference triggers immediate follow-up — calls, texts, and To-Do’s

The To-Do's section is your daily task engine. It has **four tabs** — each representing a different category of follow-up work. Review all four every shift, address **overdue items first**, and never let a task live only in your head.

 REVIEW ALL 4 · EVERY SHIFT

01

TAB 01

My To-Do's

Your personal task list — everything assigned directly to you. This is your starting point every shift. Overdue items appear at the top and must be addressed before anything else.

- > **Overdue first** — any item past its due date is a priority
- > AI-generated tasks from call recordings appear here automatically
- > Mark complete immediately after action — do not leave tasks open

 **Daily Action:** Start every shift here — clear overdue items before moving on

03

TAB 03

Sales

Your leasing pipeline management tool. Every prospect, tour, and application should generate a Sales To-Do. This tab keeps the leasing funnel moving from first call to signed lease.

- > Follow up with prospects within **24 hours** of their call
- > Tour confirmation and post-tour follow-up tasks appear here
- > Application status updates and approval follow-ups tracked here

 **Leasing Impact:** Unworked Sales To-Do's = lost prospects and empty units

02

TAB 02

Rent

Your collections follow-up engine. Every item in the Rent tab represents a direct revenue impact. Missing a Rent To-Do is not just a task failure — it is a financial failure.

- > Cross-reference with the **Collections section** Difference number
- > Every delinquent tenant should have an active Rent To-Do
- > Log outcome of every follow-up call or text in the record

 **Revenue Impact:** Every unworked Rent To-Do is money not collected

04

TAB 04

Maintenance

Work order follow-up tasks that directly affect resident retention. A maintenance request that goes unacknowledged is one of the top reasons tenants choose not to renew their lease.

- > Cross-reference with the **Maintenance Requests section** daily
- > Every Unassigned request should generate a Maintenance To-Do
- > Update tenant on status — even a "still working on it" call matters

 **Retention Impact:** Ignored maintenance = lease non-renewals and negative reviews

The Rent tab is your **collections follow-up engine**. Every item in this tab represents money that is owed and not yet collected. Each one requires a specific action — and every day you delay is a day closer to a delinquency becoming an eviction.

WHAT YOU'LL FIND IN THE RENT TAB	YOUR ACTION STANDARD
01 Late Rent Notices Tenants who have not paid by the due date — requires an outreach call or text the same day the item appears	 Contact Within 24 Hours Every late rent item requires a call or text the same day it appears. Do not let a late rent item sit overnight without outreach.
02 Payment Arrangements Tenants who made a partial payment or a promise-to-pay agreement — requires follow-up on the agreed date	 Log Every Arrangement in the System If a tenant commits to a payment date, log it immediately in PropertyMax.ai. Verbal agreements that are not logged do not exist.
03 Eviction Follow-Ups Active eviction cases requiring status updates — must be tracked daily and escalated if no response within 48 hours	 Escalate After 48 Hours of No Response If a tenant has not responded to outreach within 48 hours, escalate to the regional manager. Do not continue waiting silently.
04 Balance Confirmations Tenants requesting balance clarification — confirm the amount in the system before responding to avoid disputes	 Confirm Balance Before Closing Before closing any balance confirmation To-Do, verify the amount in the system matches what you communicated to the tenant.

The **Sales tab** is your leasing pipeline management center. Every prospect, tour, application, and lease signing should generate a Sales To-Do. If a prospect is not in your Sales tab, they are not in your pipeline — and they will not become a resident.

THE 4 CORE SALES TO-DO TYPES

- 01

Follow-Up Call
After calls with no decision, the AI creates a follow-up — complete it on time.

🕒 COMPLETE WITHIN 24 HOURS
- 02

Tour Confirmation
Confirm scheduled tours 24 hours in advance via text and call to avoid no-shows.

🕒 24 HOURS BEFORE TOUR
- 03

Application Follow-Up
Confirm receipt of applications, answer questions, and keep the approval moving.

🕒 WITHIN 48 HOURS
- 04

Lease Signing Coordination
Schedule signing, confirm documents, and follow up post-signing to ensure move-in.

🕒 BEFORE APPROVAL EXPIRES

LEASING PIPELINE STAGES

- **Prospect**
→ Create record, log 5 Golden Questions

- **Tour Scheduled**
→ Confirm 24 hrs before via call + text

- **Tour Completed**
→ Same-day follow-up, send application link

- **Application Submitted**
→ Confirm receipt, answer questions

- **Approved**
→ Schedule lease signing immediately

- **Lease Signed**
→ Confirm move-in date and next steps

APPOINTMENT WORKFLOW — 5 STEPS

- 01

Schedule the Appointment

Create the appointment in PropertyMax.ai — never on a personal calendar. Set type, date, time, and assign to the correct unit or prospect.
- 02

Send Confirmation

Send a confirmation text or email through the platform immediately after scheduling. Confirm 24 hours before the appointment as well.
- 03

Conduct the Appointment

Show the unit, complete the inspection, or conduct the meeting as scheduled. Be on time — every missed or late appointment is a lost opportunity.
- 04

Click the Complete Checklist Button

After the appointment, open the record and click **Complete Checklist**. This updates the status in real time and triggers AI follow-up To-Do's.
- 05

Verify Status Shows "Completed"

Confirm the appointment record shows **Completed** — not just closed. Incomplete records block AI-generated follow-up actions.

CALENDAR COLOR-CODING REFERENCE

COLOR	APPOINTMENT TYPE	WHAT TO EXPECT
 Blue	Leasing Appointments	Tours, move-ins, renewals, and prospect meetings
 Orange	Maintenance Appointments	Scheduled repairs, vendor visits, and work orders
 Teal	Section 8 Inspections	HUD-required inspections — compliance-critical

THE COMPLETE CHECKLIST BUTTON

Why It Matters

- Clicking Complete Checklist does more than mark the appointment done — it triggers the AI to generate follow-up To-Do's, update the prospect record, and log the outcome in the system.
- ✓ Updates appointment status to **Completed** in real time
 - ✓ Triggers AI-generated follow-up To-Do's for the prospect
 - ✓ Logs outcome in the CRM prospect record automatically

Every text message to a tenant or prospect must be sent through **PropertyMax.ai** — not a personal phone, not a third-party app, not email. The Text Messages section is your centralized communication log. If it is not in the system, it did not happen.

No Personal Phones

Texts sent from personal devices are invisible to the team, cannot be audited, and create liability. Every communication must be traceable in the platform.

Full Visibility for the Whole Team

When communications go through PropertyMax.ai, any team member can see the full conversation history — no more “I didn’t know they were already contacted.”

Accountability and Compliance

The platform creates a timestamped, searchable record of every message. This protects you, the property, and the company in any dispute or audit.

AI Follow-Up Requires Platform Data

AI-generated To-Do’s and follow-up suggestions are only triggered by communications logged in PropertyMax.ai. Off-platform messages break the automation chain.

DASHBOARD • TEXT MESSAGES SECTION

PropertyMax.ai · Dashboard · Text Messages panel

Section 8 inspections are **HUD-mandated** — missing or delaying one puts the property’s housing assistance contract at risk. Every inspection moves through three statuses: **Pending**, **Scheduled**, and **Completed**. The Pending column requires daily attention.

HUD COMPLIANCE CRITICAL

 STATUS 01 Pending DAILY ACTION REQUIRED	 STATUS 02 Scheduled CONFIRMATION REQUIRED	 STATUS 03 Completed CLOSE THE LOOP
01 Review Pending Column Every Morning Every unscheduled inspection in the Pending column is a compliance risk. Check it before anything else in your morning routine. 02 Contact the Tenant Immediately Call or text the tenant to schedule access. Do not wait for them to reach out — the scheduling obligation is yours. 03 Assign a Date and Move to Scheduled Once a date is confirmed, update the record in PropertyMax.ai and move the inspection to Scheduled status immediately. 04 Escalate If No Response in 48 Hours If the tenant has not responded within 48 hours, escalate to the regional manager. Do not let it sit silently.	01 Confirm 24 Hours Before Send a confirmation text and call the tenant the day before the inspection. No-shows are almost always a failure to confirm. 02 Prepare All Documentation Have the inspection checklist, unit history, and any outstanding maintenance records ready before the inspector arrives. 03 Ensure Unit Access Is Arranged Confirm the tenant will be present or that you have authorized access. A locked door on inspection day is a failed inspection. 04 Log Any Pre-Inspection Issues If you identify maintenance issues before the inspection, create a Maintenance Request immediately — do not wait for the inspector to find them.	01 Click the Complete Checklist Button After the inspection, open the record and click Complete Checklist. This updates the status and triggers follow-up actions. 02 Log Inspection Outcome Record whether the inspection passed, required repairs, or was failed. Every outcome must be documented in the record. 03 Create Maintenance Requests for Failures If the inspection identified issues, create a Maintenance Request immediately and assign it before closing the inspection record. 04 Press the Red X to Close the Record After all follow-up actions are logged, press the Red X to close the inspection record. This signals the loop is fully closed.
 Every unscheduled day = compliance risk	 Confirm 24 hrs before — every time	 Red X = loop fully closed

PRO PROSPECTS MOST CRITICAL	TEN TENANTS	VEN VENDORS	DIR DIRECTORS	EMP EMPLOYEES
-----------------------------------	----------------	----------------	------------------	------------------

PRO TAB – PROSPECTS (MOST OPERATIONALLY CRITICAL)

Every prospect who calls gets a record in the **PRO tab**. The AI auto-populates fields from the call recording — your job is to review, complete, and act on every record before end of shift.

- 01

Review AI-Generated Fields

After every call, open the prospect record and verify the AI-populated fields: name, unit size, move-in date, budget, and contact info. **Correct any errors immediately.**
- 02

Check Auto-Generated To-Do's

The AI creates follow-up To-Do's for every prospect record. Open the To-Do's tab inside the record and confirm they are assigned, dated, and actionable.
- 03

Send Follow-Up Text Through the Platform

Use the **Send Message** button inside the prospect record — never a personal phone. This keeps the full conversation thread in the CRM and triggers AI tracking.
- 04

Archive Closed Prospects

When a prospect is no longer active (moved in, declined, or unresponsive after 30 days), move them to **Archive** to keep the active PRO tab clean and actionable.

OTHER CRM DIRECTORY TABS

- TEN

Tenants

Active resident records with lease dates, contact info, and communication history. Use this tab for **rent follow-up calls** and maintenance coordination. Never call a tenant from a personal phone — use the Send Message button here.
- VEN

Vendors

Approved vendor contacts for maintenance and property services. When assigning a maintenance request to a vendor, **find their contact here first** — do not use personal contacts or Google searches.
- DIR

Directors

Company leadership directory for internal escalation. Use this tab when a situation requires **regional manager or director involvement** — tickets, maintenance escalations, or compliance issues.
- EMP

Employees

Team member records and contact information. Use this tab to **find a colleague's contact** when coordinating coverage, shift handoffs, or internal communications through the platform.

Every prospect call must end with a **completed CRM record**. This 8-step workflow ensures the AI has the data it needs to generate follow-up To-Do's, track the leasing pipeline, and surface the right actions at the right time.

01

Open the PRO Tab

Navigate to **CRM Directory** → **PRO tab**. This is your starting point for every post-call workflow.

→ START HERE

02

Find the Prospect Record

Search by name or phone number. The AI creates the record automatically — your job is to locate and open it.

🔍 SEARCH BY NAME OR PHONE

03

Open the Edit Form

Click the Edit button to open the full record. Do not just view — you need to be in edit mode to verify and correct AI-populated fields.

✎ CLICK EDIT — NOT JUST VIEW

04

Review AI-Generated Fields

Verify: name, phone, unit size, move-in date, budget, and contact preference. **Correct any errors** — bad data produces bad follow-up actions.

🛠️ CORRECT ERRORS IMMEDIATELY

05

Check Auto-Generated To-Do's

Open the To-Do's tab inside the record. Confirm all AI-generated tasks are assigned, dated, and ready to action. Add any the AI missed.

📋 ADD MISSING TASKS MANUALLY

06

Review the AI Call Summary

Read the AI-generated call summary. Confirm it accurately captures the conversation — add notes for anything important that was missed.

📝 ADD NOTES IF NEEDED

07

Send Follow-Up Text

Use the **Send Message button** inside the record — never a personal phone. This keeps the full thread in the CRM and triggers AI tracking.

💬 PLATFORM ONLY — NO PERSONAL PHONES

08

Archive Closed Prospects

When a prospect moves in, declines, or goes unresponsive after 30 days — move to **Archive**. Keep the active PRO tab clean and actionable.

🗑️ 30-DAY RULE FOR UNRESPONSIVE

⚠️ **Workflow Rule:** Complete all 8 steps for every prospect call before end of shift. An incomplete record means the AI cannot generate follow-up actions — and the prospect falls through the cracks.

Maintenance Requests must be worked in **priority order** — Unassigned first, then Overdue, then Assigned. Every request that goes unacknowledged is a resident who feels ignored and a lease renewal at risk.

WORK IN PRIORITY ORDER — EVERY SHIFT

01**Unassigned**

ASSIGN IMMEDIATELY

Unassigned requests mean a resident has no one working their issue. **Assign to a vendor or tech before moving on.**

02**Overdue**

FOLLOW UP NOW

Past expected completion — **contact the vendor or tech immediately** and update the tenant with a new date.

03**Assigned**

MONITOR PROGRESS

Work is in progress. **Check in with the vendor** if the date is near and proactively update the tenant.

04**Completed**

PRESS RED X TO CLOSE

Confirm the work is done before closing. **Call or text the tenant to verify satisfaction**, then close the record.

UNASSIGNED = IMMEDIATE ACTION

OVERDUE = FOLLOW UP NOW

DASHBOARD • MAINTENANCE REQUESTS PANEL

PropertyMax.ai • Dashboard • Maintenance Requests — Unassigned and Overdue view

THE TWO NUMBERS ON EVERY BUILDING HEADER

Each building shows **two numbers**: total open requests and unassigned. If the second is not zero, address unassigned items first.

Retention Rule: Every ignored maintenance request is a reason for a tenant not to renew. Residents who feel heard stay. Residents who feel ignored leave — and leave reviews.

The **Red X** is your **completion signal** — it means: **reviewed, actioned, and confirmed done**. Until you press it, the item remains open on the board and in the AI’s tracking queue. It appears in three places: **Call Recordings, Maintenance Requests, and Tickets**.

LOCATION 01
Call Recordings

PRESS THE RED X ONLY AFTER YOU HAVE:

- ✓ **Listened to the full recording** — not just the AI summary
- ✓ **Verified the AI-generated To-Do’s** are accurate and assigned
- ✓ **Confirmed the prospect record** in the CRM is complete and correct
- ✓ **Sent any required follow-up** text or email through the platform

RED X CONFIRMS

This call has been **fully reviewed** and all required actions are in motion.

LOCATION 02
Maintenance Requests

PRESS THE RED X ONLY AFTER YOU HAVE:

- ✓ **Confirmed the work is physically done** — not just marked complete by the vendor
- ✓ **Called or texted the tenant** to verify they are satisfied with the repair
- ✓ **Logged any follow-up actions** if the repair was incomplete or requires a return visit

Maintenance Requests — Completed status with Red X

LOCATION 03
Tickets

PRESS THE RED X ONLY AFTER YOU HAVE:

- ✓ **Read the full ticket** — not just the subject line
- ✓ **Taken the required action** — approved, denied, escalated, or replied
- ✓ **Followed up on sent tickets** that have been open for more than 24 hours without a response
- ✓ **Escalated to regional manager** if the ticket has been open for 2+ days with no resolution

RED X CONFIRMS

This ticket has been **read, actioned, and resolved** — or escalated with a clear owner.

The Rule: If you have not pressed the Red X, the loop is not closed. The item stays on the board, stays in the AI queue, and stays your responsibility until you do.

Tickets are your **internal communication channel** with leadership and the regional team — not a tool for tenant issues. Use Tickets when you need a decision, a reimbursement, tech support, or to escalate a staffing matter.

 INTERNAL TEAM USE ONLY

THREE TICKET SECTIONS

- 01

Tickets Received

BLUE • ACTION REQUIRED

Tickets sent **to you** from leadership or the regional team. Read every ticket, take the required action, and press the **Red X** when resolved. Do not leave Received tickets unread.
- 02

Sent Tickets

GREEN • MONITOR & FOLLOW UP

Tickets **you submitted** to leadership. Do not submit and forget — if no response in 24 hours, follow up. If no response in 48 hours, contact the regional manager directly.
- 03

Completed Tickets

ARCHIVE • LOOP CLOSED

Tickets where both sides have confirmed resolution. Review completed tickets weekly to **confirm all actions were taken** and nothing was missed before the ticket was closed.

THREE TICKET TYPES

- 

Check Request

Payment, reimbursement, or vendor invoice approval
- 

Technology

Platform issues, login problems, or system access requests
- 

Employee

HR matters, scheduling, staffing, or internal escalations

DASHBOARD • TICKETS SECTION

PropertyMax.ai · Dashboard · Tickets — Received and Sent views

 **NOT FOR TENANT ISSUES**

Tickets are **internal only**. Never use the Tickets section to communicate with or about tenants. Tenant issues go in **Maintenance Requests** (repairs), **Text Messages** (communication), or **CRM Directory** (prospect/tenant records).

 **Follow-Up Rule:** Check Sent Tickets every day. If a ticket has no response after 24 hours, follow up. After 48 hours, contact the regional manager directly — do not wait for the system to escalate for you.

Submitting a ticket is not the end of the task — it is the beginning of a **follow-up obligation**. Every ticket you send must be tracked until it is resolved. Use this escalation standard without exception.

⚠️ SUBMIT AND FORGET = ACCOUNTABILITY GAP

ESCALATION TIMELINE — EVERY SENT TICKET

0

SAME DAY

Wait — Allow Processing Time

NO ACTION NEEDED

The ticket has just been submitted. Allow the recipient time to receive and review it. **Do not follow up on the same day** — it creates noise and undermines the process.

1

DAY ONE

Check Status in Sent Tickets

VERIFY RECEIPT

Open the Sent Tickets section and confirm the ticket shows as received. If there is **no update or acknowledgment**, send a brief follow-up message through the platform.

2

DAY TWO

Contact the Regional Manager

ESCALATE DIRECTLY

If the ticket is still unresolved after 48 hours, **contact the regional manager directly** — by phone or through the platform. Do not wait for the ticket to resolve itself.

3+

DAY THREE+

Escalate to Leadership

CRITICAL DELAY

A ticket unresolved after 72 hours is a **critical delay**. Escalate immediately to the director level using the CRM Directory. Document every escalation step in the ticket record.

DASHBOARD • SENT TICKETS SECTION

PropertyMax.ai · Dashboard · Tickets → Sent Tickets panel

💡 WHY THIS STANDARD EXISTS

Tickets are the internal communication backbone of the property. When they go untracked, **check requests stall, technology issues persist, and employee concerns go unheard**. The follow-up standard exists to prevent every one of those outcomes.

Every reactive day starts with a skipped morning routine. These **six steps in order** ensure nothing falls through the cracks — every tenant is heard, every request is assigned, every follow-up is sent before the phones start ringing.

✅ DO THIS BEFORE ANYTHING ELSE

01 \$ Collections Review all outstanding rent balances. Flag accounts that are 3+ days past due. Send a reminder text through the platform — not a personal phone. Log every action in the record. ■ FLAG → TEXT → LOG	02 🎧 Call Recordings Open the 5 tabs: Missed, Voicemail, AI Flagged, Recent, All. Review every unreviewed call. Complete all action items. Press the Red X on each reviewed recording. ■ REVIEW → ACTION → RED X	03 ☑️ To-Do's Work through all open To-Do's — Rent, Sales, Maintenance, and Other. Complete each task, add notes, and close completed items. Do not carry yesterday's To-Do's into tomorrow. ■ WORK → NOTE → CLOSE	04 🔧 Maintenance Check Unassigned first — assign every one before moving on. Then check Overdue — contact the vendor and update the tenant. Zero unassigned requests by end of morning routine. ■ ASSIGN → FOLLOW UP → UPDATE	05 🎫 Tickets Check Tickets Received — read and action each one. Check Sent Tickets — follow up on anything older than 24 hours with no response. Submit and forget is not acceptable. ■ READ → ACT → FOLLOW UP	06 💬 Text Messages Reply to every unanswered text from tenants and prospects. No message should go unanswered past the start of your shift. Every unanswered text is a resident who feels ignored. ■ READ → REPLY → CLEAR
--	--	--	---	--	---

⚠️ **Non-Negotiable:** This routine is not optional — it is the difference between a reactive day and a proactive one. Complete all six steps before answering the first non-emergency call.

The Red X Appears in Three Places

Pressing the red X is how you close out completed items and keep the dashboard clean. Know exactly when and where to use it.

01 — CALL RECORDINGS

After Reviewing a Call

WHEN TO PRESS IT

- You have listened to the full recording
- All action items have been checked and completed
- Any follow-up (callback, note, update) has been handled
- The call no longer requires attention

Do **not** close a call until every checkbox is confirmed.

02 — MAINTENANCE REQUESTS

After Confirming Completion

WHEN TO PRESS IT

- The request status shows **Completed**
- You have hovered to read the full description and verified the work
- The resident has been notified if needed
- No further action is required on this item

Filter by **Completed** status first — never close an open or assigned request.

03 — TICKETS

After Reviewing & Acting

WHEN TO PRESS IT

- You have read the full ticket description
- Any required action (reply, escalation, note) has been taken
- The ticket is resolved or forwarded to the right person
- Both Received and Sent tabs have been reviewed

Check **both** Received and Sent tabs before closing any ticket.

The Red X = Closed & Cleared. No exceptions.

If it's not closed, it's still your responsibility.

COMPLETION REQUIREMENTS

Certificates: How to Earn Yours

Complete all quizzes and acknowledgments in each module to unlock your PropertyMax.ai Training Certificate.

MODULE 01

Dashboard Training

- **1 Quiz** — Dashboard Overview
- **1 Acknowledgment** — Module completion sign-off

1 Quiz · 1 Ack

MODULE 02

Phone Excellence

- **Quiz 1** — Four Pillars of Excellence
- **Quiz 2** — 5 Golden Questions
- No module acknowledgment required

2 Quizzes

MODULE 03

Marketing Training

- **9 Quizzes** — Call Recordings, Collections, To-Do's, Appointments, Text Messages, Section 8, CRM Directory, Maintenance Requests, Tickets
- **1 Acknowledgment** — Module completion sign-off

9 Quizzes · 1 Ack

TOTAL REQUIREMENT

12 Quizzes + 2 Acknowledgments = Your Certificate

PASSING SCORE

70% or higher per quiz

Key Takeaways

01

5 Call Recording Tabs

Check all five tabs every single morning — not just Missed calls.

- **All** — complete call history
- **Missed** — priority follow-ups
- **Incoming / Outgoing** — call logs
- **Voicemail** — never miss a message

02

Calendar Color-Coding

Every appointment type has a distinct color — always verify the color before confirming a booking.

- Color = appointment **type & priority**
- Never book without **checking availability**
- Confirm **date, time & type** with caller

03

CRM Directory Tabs

Know all five CRM tabs — each stores a different contact type and must be used correctly.

- **PRO** — Prospects
- **TEN** — Tenants
- **VEN** — Vendors
- **DIR** — Company Directory
- **EMP** — Employment

Key Takeaways

01

Four Pillars — Every Single Call

Professionalism, Warmth, Accuracy, and Consistency are not aspirational goals — they are the minimum standard on every call, every time, without exception.

PROFESSIONALISM

WARMTH

ACCURACY

CONSISTENCY

02

5 Golden Questions — Every Prospect Call

Capture **Name**, **Phone**, **Email**, **Appointment**, and **Source** on every prospect call. A call without all five questions is an incomplete call — period.

NAME

PHONE

EMAIL

APPOINTMENT

SOURCE

03

Accuracy Powers the AI

Every piece of data you enter feeds the PropertyMax.ai system. **Inaccurate data produces inaccurate insights** — and inaccurate insights lead to wrong decisions for the entire property.

THE CORE PRINCIPLE

“Every call is a first impression and a data entry event.”

The caller judges Apartment Corp by how you answer. The system judges the property by what you record. Both happen on every single call.

REMEMBER

- Warm greetings open doors
- Questions capture opportunity
- Accuracy builds the intelligence

Key Takeaways

01

Morning Routine — Work in Order

Every morning, work through Marketing Training sections in this exact sequence. Do not skip ahead or check sections out of order.

Call Recordings → Collections → To-Do's → Appointments → Text Messages → Section 8 → CRM Directory → Maintenance → Tickets

02

The Red X Is Your Completion Signal

The red X appears in three sections. Press it only after you have fully reviewed and acted — never to clear the view.

Call Recordings

After listening and completing all action items

Maintenance Requests

After confirming the work is completed

Tickets

After reading and taking the required action

03

All Communications Through PropertyMax.ai

Every call, text message, appointment, and note must live inside the platform. No personal phones, no personal texts, no external tools.

- **Text Messages** — platform only, never personal phone
- **Appointments** — calendar in PropertyMax.ai, not phone calendar
- **Notes & records** — CRM Directory, not sticky notes or email

? Questions?

Any section, any workflow — this is the time to ask.
No question is too small. If you are unsure about a process, ask now rather than guess later.

TOPICS OPEN FOR DISCUSSION

- Dashboard navigation & daily workflow
- Phone Excellence — pillars & golden questions
- Marketing Training — any of the 9 sections
- Quizzes, certificates & acknowledgments

HOW TO ASK

Raise Your Hand

Use the Zoom Reactions panel → Raise Hand. The facilitator will call on you directly.

Use the Chat

Type your question in the Zoom Chat. All questions will be read aloud and answered.

Training Hub

All videos, quizzes, and resources are available 24/7 after this session.

propertymax-ai-training-hub.manus.space

Your Next Steps

Complete all three steps to earn your PropertyMax.ai Training Certificate.

01

Complete All Quizzes

Work through all **12 quizzes** across the three modules — Dashboard Training (1), Phone Excellence (2), and Marketing Training (9). Each quiz requires a passing score of **70% or higher**. You may retake any quiz as many times as needed. Your progress is saved automatically in the Training Hub.

12

QUIZZES

02

Submit Both Acknowledgments

At the end of **Dashboard Training** and **Marketing Training**, you will find a module acknowledgment form. Read the statement carefully, enter your name, and submit. This confirms that you have reviewed all material in that module and agree to apply the standards covered.

2

ACKS

03

Earn Your Certificate

Once all quizzes are passed and both acknowledgments are submitted, your **PropertyMax.ai Training Certificate** will be unlocked automatically. Download it, save it, and share it with your manager. The Training Hub remains available to you at any time for reference and review.

DONE

Everything You Need — All in One Place

All training materials live inside the PropertyMax.ai Training Hub. Bookmark it, return to it, and use it as your daily reference.

01 Training Hub — Video Library

All PIP training videos are embedded directly in the hub — Dashboard Overview, Phone Excellence, and all 9 Marketing Training sections. Watch at your own pace, pause, and rewatch any segment.

ALWAYS AVAILABLE • NO LOGIN REQUIRED

02 12 Quizzes Across 3 Modules

Each section ends with a quiz. Passing score is 70% or higher. You may retake any quiz. Quizzes are tracked automatically — your progress is saved as you go.

RETAKE ANYTIME • PROGRESS AUTO-MAILED

03 Phone Excellence Playbook

A downloadable PDF covering all Four Pillars of Excellence, the 5 Golden Questions, caller type scripts, and the pre-shift checklist. Print it and keep it at your workstation.

PDF • PRINTABLE • KEEP AT DESK

04 Completion Certificate

Complete all 12 quizzes and 2 module acknowledgments to unlock your PropertyMax.ai Training Certificate. Certificates are generated automatically and available for download inside the hub.

AUTO-GENERATED • DOWNLOADABLE
