

Granite Ridge — K-1 Ownership Percentage Discrepancies

Date: July 27, 2026

Prepared by: Grove Park Investor Portal

Purpose: Comparison of ownership percentages currently stored in the investor portal database vs. the actual percentages shown on the 2025 filed K-1s.

Summary

All 17 Granite Ridge investors show discrepancies between the database values (sourced from the original investor spreadsheet) and the percentages on the actual 2025 K-1 filings. The K-1 values should be considered authoritative.

Two notable findings:

- **MT Stockton LLC** — the database shows 24.99% but the K-1 shows only 0.0702%. This is a significant discrepancy that warrants immediate review.
 - **Marc & Ellie Menowitz Family Trust** — there are **two separate K-1s** filed (#14 and #19), indicating two distinct partnership interests (29.3677% and 0.3975% respectively). The database currently has a single entry at 22.041%.

Recommended Actions

1. **MT Stockton LLC** — Verify whether 24.99% or 0.0702% is correct. The gap is too large to be a rounding issue; one of the two sources may be referencing a different entity or tax year.
2. **Marc & Ellie Menowitz Family Trust** — Determine whether the two K-1s (#14 and #19) represent two separate investor records that should both appear in the portal, or a single combined interest.
3. **All other investors** — Update portal database to reflect K-1 percentages once the above two items are resolved.
4. **Casa Major Inc** — Add as a Granite Ridge investor record if they are a current partner.
