

# Apartment Corp — Top 3 Comparables Report

---

**Portfolio:** 42 Properties (NWA / Bentonville, AR excluded per instruction)  
**Methodology:** Comparables are drawn exclusively from within the 42-property portfolio and ranked by a weighted composite score:

| Criterion                             | Weight | Notes                                                                                           |
|---------------------------------------|--------|-------------------------------------------------------------------------------------------------|
| Year Built ( $\pm 10$ yr hard filter) | 40%    | Properties outside the $\pm 10$ -year window are disqualified entirely                          |
| Affordability Program Type            | 30%    | Exact match = full credit; adjacent category (e.g., HUD $\leftrightarrow$ Layered) = 50% credit |
| Unit Count Similarity                 | 20%    | Score scales with the ratio of smaller to larger unit count                                     |
| Geographic Proximity                  | 10%    | Same state = full credit; same region = 50% credit                                              |

***Score range:** 0–100. A score of 100 indicates a near-perfect match on all four criteria.*

## Scoring Notes

- **Holiday Apts (#06, built 1951)** has only one qualifying comparable within the  $\pm 10$ -year window (Fairfax, 1965). No other portfolio property was built before 1965.
- **New Wilmington Arms (#16)** and **Riverchase (#40)** have unknown unit counts; the unit-count criterion defaults to neutral (50%) credit for those pairings.
- Properties with identical year, program, and unit count (e.g., Howell Place / Pirates Bend, Pacific Pointe / Granite Ridge) naturally score 100.0 against each other.
