

Brandon Rose

Special Projects · ApartmentCorp · Los Angeles, CA

DRIVING OPERATIONAL EXCELLENCE THROUGH TECHNOLOGY

Brandon Rose brings a unique blend of executive management, technical engineering, and advanced AI expertise to ApartmentCorp. With a strong foundation in both business operations and emerging technologies, Brandon plays a pivotal role in driving the strategic initiatives and special projects that advance the company's technological capabilities and operational efficiency.

Before joining ApartmentCorp, Brandon spent seven years in executive management directing operations for a multi-million-dollar service and equipment company — overseeing a 47-employee organization, managing payroll, compliance, and business development, while implementing electronic invoicing systems and wireless-enabled field reporting. His subsequent career as a Real Estate Advisor across Los Angeles further sharpened his skills in market analysis, property valuations, and complex negotiations.

At ApartmentCorp, Brandon applies his highly analytical mindset — rooted in a Bachelor of Science in Petroleum Engineering from Texas Tech University — to support the company's technology-driven mission. Skilled in AI platforms including ChatGPT, Claude, and Perplexity, and productivity tools such as Notion and Slack, he drives workflow automation, data analysis, and strategic content creation that keeps ApartmentCorp and Property MAX AI at the forefront of multifamily innovation.

"Leveraging advanced technology and data-driven insights to streamline operations and build smarter, more efficient real estate systems."

ENGINEERING FOUNDATION B.S. Petroleum Engineering, Texas Tech University; minors in Mechanical Engineering and Mathematics & Statistics — providing a rigorous, analytical approach to every challenge.	AI & TECHNOLOGY INTEGRATION Proficient in leading AI platforms and productivity tools applied to workflow automation, market research, and operational strategy across the ApartmentCorp portfolio.	EXECUTIVE LEADERSHIP 7+ years directing company-wide operations, financial oversight, and multi-million-dollar business development — bringing a business-first perspective to every initiative.
