

Skills Passport™

A Verified Capability Infrastructure for Education, Workforce, and Mobility

Built by a former superintendent and system leader

We Measure What's Easy, Not What Matters

Fragmented Signals

Transcripts, resumes, and postings
float disconnected

Unverified Claims

Capabilities remain subjective and
unmeasured

Mismatched Expectations

Education outputs rarely match
employer needs

System-Wide Friction

Students

Capable learners go unrecognized.
Skills don't travel.

Employers

Degrees substitute for capability.
Mismatch is the default.

Policy

Workforce decisions are made
without reliable skill data.

A Shared Capability Infrastructure

Education

Coursework and projects
become verified credentials

Workforce

Employers access skill profiles,
not just resumes

Policy

Granular workforce data enables strategic decisions

One infrastructure. Three systems. Shared clarity.

From Experience to Verified Credential

Built for Trust, Not Just Data

AI Scoring

First-pass automated evidence assessment

Institutional Validation

School or employer sign-off

Human Verification

Expert review of AI findings

Audit + Appeal

Transparent dispute resolution

Every credential is traceable, reviewable, and defensible.

From Learning to Opportunity

System

Why Now

**44% of
workers' core
skills will be
disrupted by
2027**

World Economic
Forum, Future of
Jobs Report

**Durable skills
gaps persist
across every
major sector**

McKinsey Global
Institute

**Credential
transparency
is now a
federal and
state priority**

Credential
Engine

Built and Gaining Traction

PROOF OF EXECUTION

- Live MVP in QA
- React, Node.js, AWS
- Integrated with Journeys + DNA

EARLY SIGNALS

- Engaged with 6+ districts in California
- Workforce partner conversations underway in healthcare and tech
- Pilot discussions in progress with community college partners
- Prototype validated with 40+ participants

POSITIONING

- Career tools exist (Naviance)
- Skill frameworks exist (Open Skills Network)
- Skills Passport adds the verification layer

Pilot Investment Opportunity

PILOT SCOPE

- 100–300 learners
- 6-month timeline
- 2–3 career pathways

MEASURABLE OUTCOMES

- % learners with verified skills
- Employer validation rate
- Placement signal rate

BUSINESS MODEL

- District licensing (\$8K–\$25K per site)
- Employer access (subscription-based)
- Verification services (per-credential fee)

THE ASK

- Seeking \$250K pilot investment
- Co-design with 2–3 anchor partners
- Validate model → scale

Reduces hiring mismatch and increases placement efficiency for employers — while improving student workforce outcomes.
